

# Reveal Patch Test Kit

## Portable Field Unit

### Colorimetric Fluid Contamination Analysis

The Reveal Patch Test Kit is an exclusive Fluitec offering that allows you to monitor both hard and soft contamination in lubricants and hydraulic fluids. The kit is easily portable allowing you to test your fluid directly at your equipment or throughout multiple sites. The membrane patches provided are 0.45-microns allowing you to run the Membrane Patch Colorimetry test for measuring varnish potential. The Reveal Patch Test Kit is designed to work with the iLab 475.

Reveal Patch Test Kit Includes:

- Millipore Patch Test / Filter Holder Assembly
- 110V Vacuum Pump and Tubing
- Solvent Dispensing Bottle w/Filter
- Filter Forceps
- Qty of 100, 47 mm / 0.45-Micron Patches
- MPC Procedure and Manual
- Warranty-First Year All Parts and Labor are Covered
